RaPH

Refugees and Primary Health

Expanded Chronic Care Model and
refugee communities

19 October 2009

RaPH

- Refugees and Primary Health (**RaPH**) Project – working with all primary care providers to support access to care by refugee populations
- Chronic disease management – improving clinical pathways and communication across the whole health care system

RaPH

- **RaPH's objectives include:**
- Enhancing coordinated care through Clinical and practical support of general practice
- Strengthen communication across community services, refugee communities and health care providers
- Develop resources and facilitate access to information and training opportunities for general practice staff and other health services
- Work with refugee communities to build collaboration and develop joint strategies for meeting health care needs
