

Mater Private Hospital Springfield is pleased to offer the following direct access/admission services to you and your patients.

Direct Admissions Service

📞 0481 401 403

This service provides you the convenience to directly refer your patients for admission to Mater Private Hospital Springfield, within the same day, under the care of one of our Medical Physicians.

Upon making contact with one of our team, they will discuss suitability of your patient for admission, along with arranging for bed availability, conducting a health fund check and facilitating a comprehensive handover.

Please note: Mater Private Hospital Springfield does not have an Emergency Department or Intensive Care Unit.

Please contact the Staffing and Bed Manager to arrange for admission of your patient under the Direct Admission process on 0481 401 403.

Your patient may be suitable for the Direct Admissions Service if they require treatment for the following conditions:

- medical management of diabetes
- cellulitis
- pneumonia
- exacerbation of COPD
- simple orthopaedic fractures
- other medical conditions may be suitable, please discuss with the admissions service

Direct Access Endoscopy service

📞 07 3199 3222

The Mater Private Hospital Springfield Direct Access Endoscopy Service allows suitable patients to proceed to an Endoscopic Procedure (i.e. gastroscopy, colonoscopy), without first having a consultation with a Gastroenterologist (unless required).

Once our team receives the completed referral form, one of our nurses will contact your patient to confirm their health history and organise booking of their procedure, or consultation if required. A copy of your patients' results, along with a completed Discharge Summary will be forwarded to you following their procedure.

If you, or your patients would like to know more about this service, please call us on 07 3199 3222.

Your patient may be suitable for a referral to the Direct Access Endoscopy Service if they meet the following criteria:

- age <70
- BMI <35
- no co-morbidities—cardiovascular, respiratory, diabetes
- no anticoagulation—warfarin, clopidogrel, fish oil
- no prior anaesthetic issues, including IV access

Cancer Care services include:

- a dedicated Mater Cancer Care Centre—including a linear accelerator, 15 medical oncology treatment bays and two radiation treatment rooms
- Radiation Oncology Centre onsite
